

Who are the beneficiaries:

Initially we will be working with Grade 1 children from South Africa, Mozambique, Zimbabwe, Botswana, Tanzania whose parents are not able to provide stationery for the school year. Most of the parents working bring in a total of approx \$2000 per year for the household.

Beneficiaries are from schools who have had no donations made to them in the past. Most of the schools will be in rural areas where shops are more than 20 miles away.

What do the beneficiaries need to do:

They need to work hard in their schoolwork. We will request their progress reports twice a year so that we can assess whether these children would be eligible for recurring donations. Children would also be required not to be instigators of any violence or participants in any bullying, strikes or general misconduct.

What do we provide initial beneficiaries:

A stationery box with the following: Stationery Pencil bag, a set of color pencil crayons, 12 standard HB pencils, 1 sharpener, 1 eraser, 1 stick of glue, 1 ruler, 1 stub-nosed pair of scissors, 5 A4 feint ruled soft cover books work books.

What do we provide to recurring beneficiaries:

Students who do well and continue to learn, will be eligible to receive recurring stationery per year. Each year has different requirements depending on what the schools require. For e.g. Grade 3 and up will also get ball point pens, maths sets etc.

Future plans:

We hope to assist many children throughout their entire school career. Once they get to university age, we are looking to assist students with a bursary which would be payable to us as follows:

- Attaining an A = no repayment
- Attaining a B = 25% repayment
- Attaining a C = 50% repayment
- Attaining a D = 75% repayment
- Attaining an E = 100% repayment

All repayments would go back into the bursary fund for future students.

Help us send 3 500 students to school in 2010. Donate today:
